Where people, relationships, and ideas flourish!

Programs and Events
Over 100,000 people visit the Center annually and experience hundreds of events. Our programs include:

Economic Development
The first of its kind in the nation, our program supports over 3,000 people annually in finding employment, building and growing small businesses, and finding affordable housing to rent or own.

Information and Referral
We are a hub connecting over 2,500 visitors annually to healthcare services, legal support, sexual and or domestic abuse, HIV/AIDS, and immigration resources offered throughout the Bay Area.

Youth Program
We annually provide 300 disconnected LGBTQ youth—many of them without housing—with free nourishing meals, crisis intervention, mental health support, service navigation, housing support, community building, leadership development, and 30+ hours of drop-in services weekly.

Arts and Culture
We have exhibited the works of over 200 established and emerging visual artists since we opened. The program allows them to exhibit for free and provides them with the opportunity to sell their works. The Center also hosts performances and cultural programs year-round.

Community Programs
We respond to emerging and critical needs, recently creating the city’s first ever LGBT violence prevention needs assessment and connecting community to local and national policy work through gatherings, actions, and events.

Building Facilities
Community organizations, individuals, and companies rent short-term spaces for a whole host of community events and programs. The Center provides 38,000 square feet of below-market-rate office space to our nonprofit partner tenants. The David Bohnett CyberCenter provides computer stations, free internet access, scanning and printing stations, and access to free educational programs.

Join us in making a difference! Support our ongoing community work by participating or referring people to our programs and services, volunteering, renting space, and/or becoming a donor today!

Together we will build a more equitable world for all.
